

Building a Fully Connected, Intelligent World

HUAWEI CLOUD INSPIRE 2026

June 5–6, 2026 | Shanghai West Bund Convention Center

About the Event

Huawei Cloud INSPIRE 2026 stands as the flagship tech event of the year, uniting top developers, technical experts, and industry leaders worldwide. Together, you delve into cutting-edge advancements in AI and cloud technologies, sparking transformative collaborations and driving unparalleled innovation across the global ecosystem.

10,000+

Attendees

Deeper, diverse engagement
with industry stakeholders

100+

Media agencies

100M+ impressions that
supercharge branding

100+

Exhibitors

Access to the exclusive industry
chain of tech leaders

6,000 m²

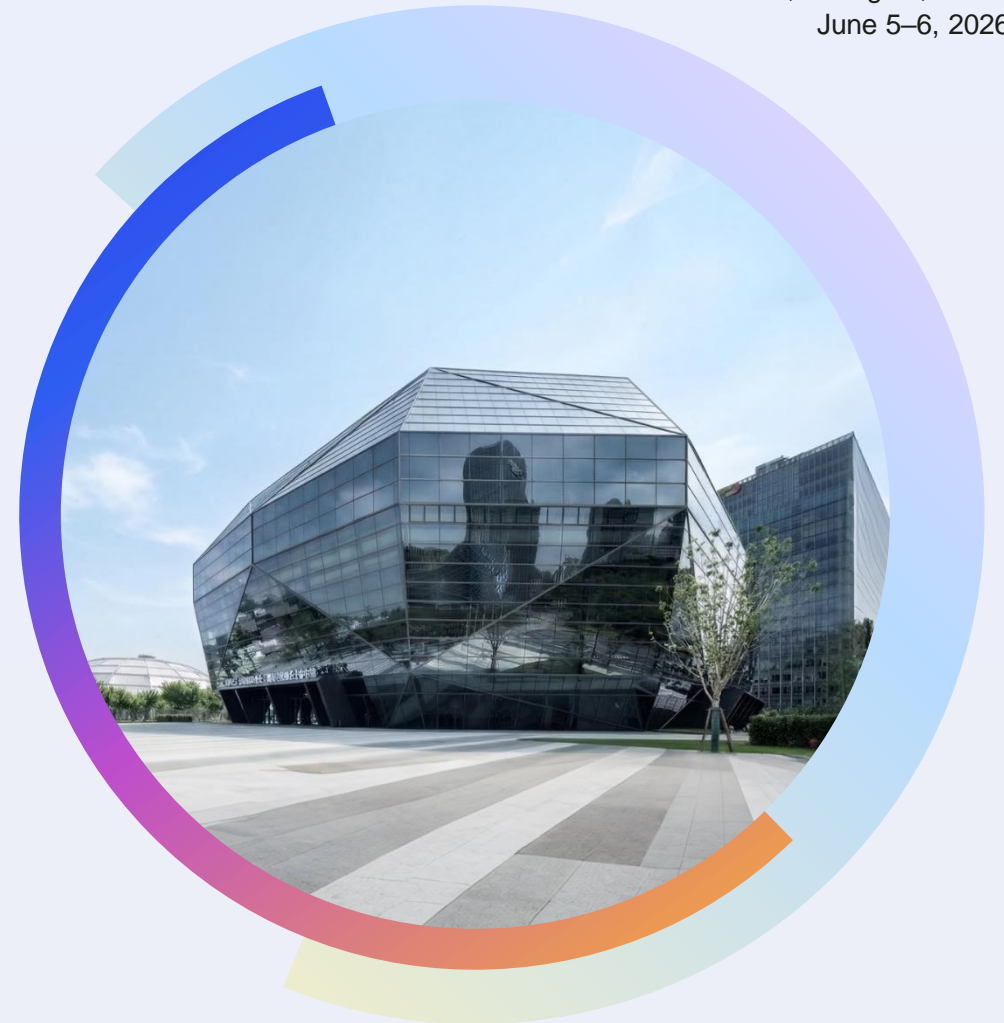

Exhibits & demos

Interactive experience for
direct customer conversion

100+

Events

Dive into the latest tech and
hands-on lab experiments

Agenda

1
Keynote

9:30–11:30, June 5

AI strategies and new releases

Keynote

+

4
Experience zones

9:00–18:00, June 5–6

First-hand experience with AI applications

Cloud AI infrastructure

Agent-based, reshaped infrastructure

Agent platform

A versatile agent development platform

Industry AI foundry

AI communities in verticals: healthcare, manufacturing, embodied AI, and more

AI showcase

Hundreds of partners' AI applications

Industry insights

Solving industry challenges with AI

+

N
Activities
Summit/Session + Open Mic

9:00–18:00, June 5–6

Best practices of AI in industries

Unveiling AI technologies

AI coding, agent development, token economy, AI security...

Solving industry AI challenges

Internet, smart healthcare, intelligent manufacturing, intelligent driving...

AI innovation ecosystem

Partners' AI innovation from indie developers and one-person companies (OPCs)

Envisioning the AI future

Advanced public cloud

AI in practice

How AI works in real business

In-depth breakdown

Know-how

How can AI technologies solve enterprises' problems?

Keynote

AI strategies and new releases from top experts

Huawei Cloud AI strategy and new products

Fully upgraded AI solutions

Optimal technology stack for agent innovation

- New: distributed AI cloud infrastructure
- Upgraded: one-stop platform for AI training and inference
- New: agent platform and various in-house OpenClaw solutions
- New: one-stop platform for embodied AI development

Industry best practices

Breaking down the optimal path to AI innovation

- Diverse cloud AI compute, laying a solid foundation for AI innovation
- One-stop cloud development platform, accelerating embodied AI data preparation and model training
- AI coding agent, accelerating enterprise application development
- Smart healthcare solution based on edge-cloud synergy, equipping township hospitals with cutting-edge diagnosis and treatment capabilities

Live showcases

Intensive tech insights, tangible results in action

- AI-accelerated enterprise application development
- Simplified agent development for production
- Embodied AI: live robotic demo

Experience Zones

Immersive tech experience, AI innovations before your eyes

Cloud AI infrastructure

Agent-based, reshaped infrastructure

AI compute cluster, efficient resource management and scheduling
One-stop model training and inference platform
AI training/inference/agent security
Scenario-specific intelligent O&M agent
...

Agent platform

A versatile agent development platform

Agent development platform
Coding agent
Data agent
...

Industry AI foundry

Scenario-based co-creation, shared capabilities

Smart healthcare
Smart manufacturing
Embodied AI
Intelligent driving model training
...

AI showcase

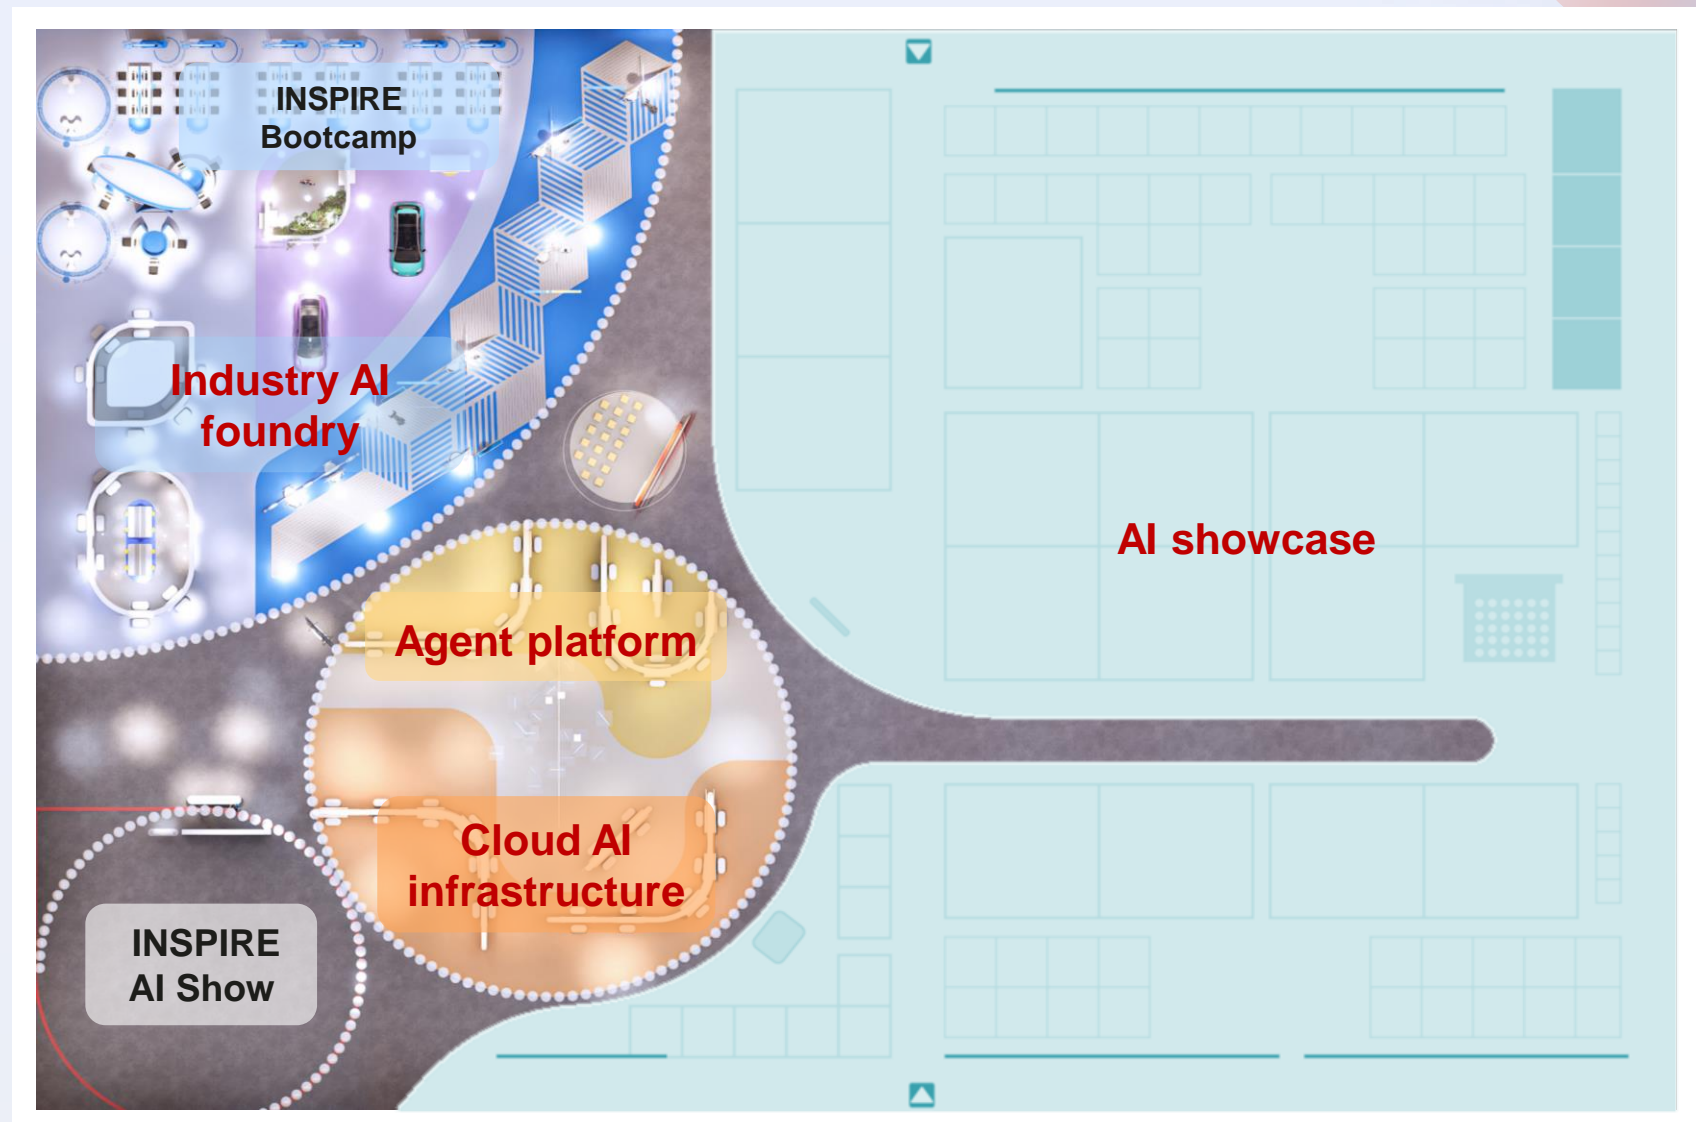

Trending AI applications from 100 partners

AIGC
AI companion
AI for science
AI digital employees
...

Experience Zones Layout

Discover every marvel of AI

Activities: Face-to-Face Expert Talks on the Best Practices of AI in Industries

<Technical>

Unveiling AI technologies

Co-hosted by third parties

Token economy

From production to supply and application

AI coding

Hosted by AiDD

From AI-assisted to AI-led

Agent development

Easy development of enterprise-level agents

Hybrid cloud AI compute foundation

Co-hosted by third parties

Reshaping government and enterprise productivity with AI

AI security

Co-hosted by third parties

AI security guardrails reassure enterprises

<Industry>

Solving industry AI challenges

Hosted by Ruijin Hospital

Smart healthcare

AI-assisted pathological diagnosis

Embodied AI

Co-hosted by third parties

Embodied intelligence development

Intelligent manufacturing

Building industrial agents from scratch

Intelligent automotive

Co-hosted by third parties

Intelligent vehicles and smart driving

Internet

Co-hosted by third parties

From model-driven to full adoption

Commercial market

Partnering to start lean on AI for SMBs

<Ecosystem and open mic>

AI innovation ecosystem

Hosted by CSDN

AI developers

From indie developers to OPCs

Ecosystem partners

Building the AI foundry together

Service partners

Building irreplaceable AI delivery capabilities

Open Mic

Co-hosted by third parties

Partners' AI innovation

<Vision>

Envisioning the AI future

Hosted by the Public Cloud Industry Alliance

Industry development

The next step of AI and public cloud

INSPIRE Bootcamp

Turn ideas into reality

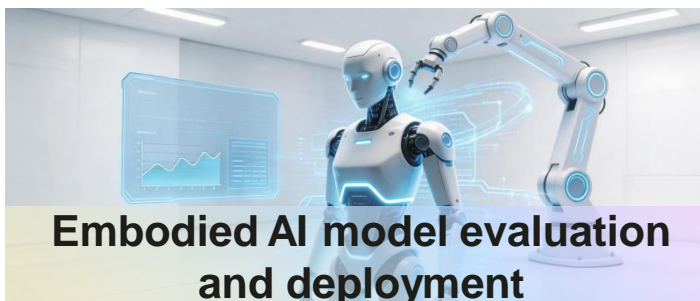

Enterprises' OpenClaw adoption

- Quickly getting started with OfficeClaw
- Natural language-driven development of enterprise-class applications
- Developer Space + CodeArts, quickly building OpenClaw
- OpenClaw in everyday office
- ...

CodeArts in action

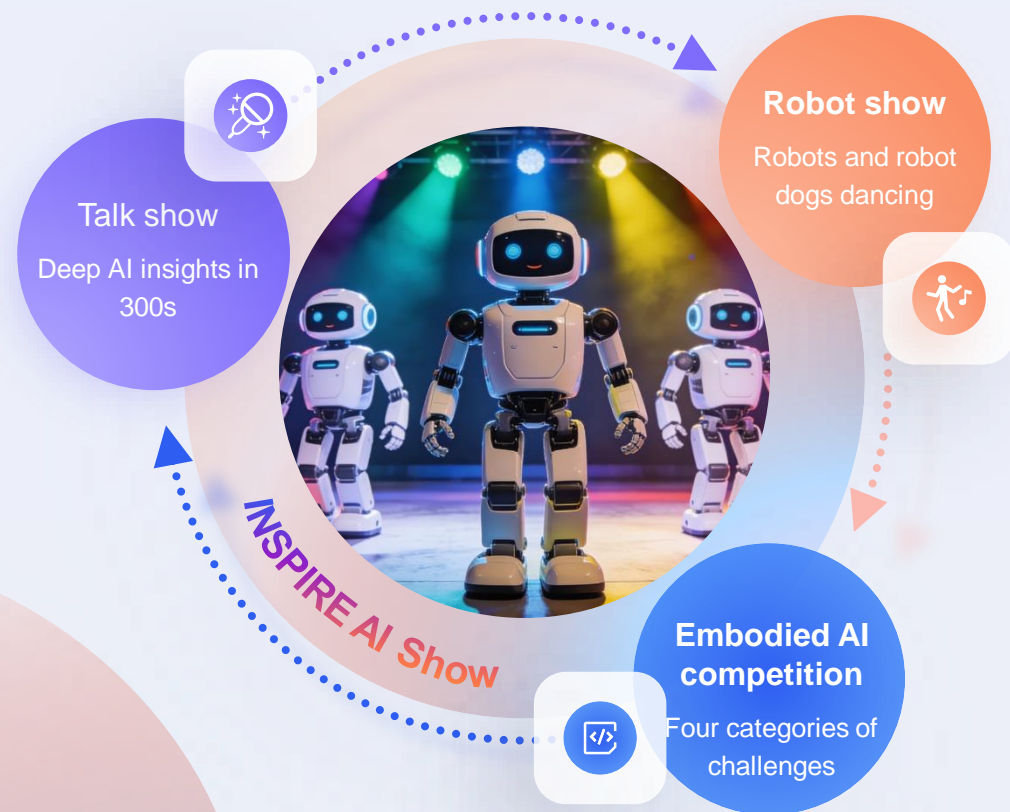

- AI-assisted development
- Developing and debugging HarmonyOS-native apps
- Developing enterprise API security audit programs
- ...

Embodied AI model evaluation and deployment

- Model simulation evaluation
- One-click model deployment on devices
- ...

Interactions: Spark Intelligence at 30+ Spots

Yunbao reception & INSPIRE parade

20+ characters for a premium experience

30+ activity spots

Coffee, AI customization, motion-sensing game-play, etc.

Claim souvenirs

Yunbao blind boxes, art toys, stickers, etc.

Passion for the Era. Vision for the Future.
Join us in the journey!
